

Your final gift could last for generations.[®]

Dear Sir/Madam,

Thank you for your inquiry. BioGift serves as a link between individual donors, medical researchers and educators. More and more people every day are choosing BioGift's Willed Body to Science Program because it helps to enhance the lives of others by supporting the health sciences through research and education. Our program is open to almost everyone regardless of age or medical history.

Due to the needs of our program to facilitate research and education, we provide as part of the donation process:

- A personalized emergency identification card
- The initial transportation from the place of death to our facility
- Coordinating the filing of the death certificate
- Coordinating the cremation with a licensed crematory
- Return of cremated remains (see next page for more information)
- A thank you letter for the family

BioGift is reimbursed for these expenses by medical researchers and educators.

The most caring thing you can do is to make sure your family is aware of your wish to donate. We believe the choice to donate is made easier when it is a family decision. Please advise us if you received this packet as a hospice patient so that we can better serve you or your family. We are available 24 hours a day to answer any questions that you might have.

Helping others through medical research and education is a privilege that we take very seriously. Please register today!

Sincerely,

BioGift Anatomical Staff
